Billing and Usage

Seat billing

Understand how seat-based billing works for teams and organizations on Cal.com.

Cal.com bills teams and organizations based on the number of seats used during each billing period. Depending on your plan, you may see one of two billing models in your billing settings: **high water mark billing** or **active user billing**.

High water mark billing

With high water mark (HWM) billing, you are billed for the **peak number of team members** at any point during your billing cycle — not just the count at the end of the month.

For example, if your team starts the month with 10 members, grows to 15 mid-month, then drops back to 12, you are billed for 15 seats that month.

What you see in billing settings

When HWM billing is active, the **Seat billing** section appears on your team or organization billing page. It shows:

- Current members** — the number of members on your team right now
- Peak seats this period** — the highest member count recorded since the billing period started
- Billed seats** — the number of seats you are charged for (the higher of current members or peak seats, with a minimum of 1)

Dashboard (Right Side)

- Overview
- Storage
- Interviews
- Resumes & Attachments
- Metrics & Limits

Content:

Dashboard

Manage your interviews, resumes, storage, and account activity from a single centralized view.

What this page is

The Dashboard is your **control center** for OpenInterview.

It provides:

- Storage usage (video + documents)
- Interview performance metrics
- Quick access to interviews and resumes

- Plan limits and upgrade options
-

When to use this page

Use the Dashboard to:

- Monitor how many interviews you've created and shared
 - Track views and engagement
 - Manage uploaded resumes and attachments
 - Check storage limits
 - Upgrade your plan when needed
-

Page overview

The Dashboard is divided into five main sections:

1. Storage usage
 2. Performance metrics
 3. Plan status and upgrade
 4. Interviews table
 5. File management (resumes and attachments)
-

Storage usage

Displays how much storage you are using across your account.

Video storage

Shows how much video storage is used for recorded interviews.

- Format: X MB / Y GB
- Includes:
 - Recorded interview videos
 - Uploaded video responses

Document storage

Tracks uploaded files such as resumes and attachments.

- Format: X KB / Y MB
- Includes:
 - PDF resumes
 - Images
 - Supporting documents

Notes

- Storage limits are based on your plan
 - Exceeding limits may prevent new uploads
-

Performance metrics

Provides a quick snapshot of your activity.

Shares (Published)

Number of interviews currently published and shareable.

- Format: X / Y
- X = active published interviews
- Y = total allowed based on your plan

Total views

Total number of views across all shared interviews.

- Includes:
 - Public profile views
 - Shared link visits

Bookings

Shows interview booking activity.

- Locked behind paid plans
 - Displays as:
 - 0 / 0 for free users
 - Active counts for paid users
-

Plan and upgrade

Displays your current plan limitations and upgrade options.

Upgrade panel

Includes:

- Call-to-action: **Upgrade Plan**
- Message explaining benefits:
 - More shares
 - Booking access
 - Increased limits

When to upgrade

You should consider upgrading if:

- You've reached your share limit
 - You need booking functionality
 - You require more storage
-

My Interviews

Displays all interviews created in your account.

Table columns

Column Description

Title	Name of the interview
Date	Creation date
Shared	Whether the interview is publicly shared
Views	Number of views
Status	Draft or Published
Actions	Available actions

Status types

- **Draft**
 - Not visible publicly
 - Cannot be shared
 - **Published**
 - Publicly accessible
 - Can be shared via link
-

Actions

Each interview includes the following actions:

- View profile
 - Share interview
 - Edit interview
 - Delete interview
-

Sharing rules

- Only **published interviews** can be shared

- Draft interviews must be published first

My Resumes

Displays all uploaded resumes.

Table columns

Column	Description
File Name	Name of the uploaded resume
Upload Date	Date uploaded
Size	File size

Notes

- Multiple versions of the same resume can be uploaded
- Used for:
 - Interview profiles
 - Sharing with employers

My Attachments

Displays additional uploaded files.

Supported file types

- Images (PNG, JPG)
- Videos (MP4)
- Documents

Table columns

Column	Description
File Name	Name of the file
Upload Date	Date uploaded
Size	File size

Common uses

- Portfolio samples
- Supporting documents
- Profile assets

Common workflows

Create and share an interview

1. Click **New Interview**
2. Complete interview setup
3. Publish the interview
4. Share the generated link

Upload a resume

1. Navigate to Dashboard
2. Scroll to **My Resumes**
3. Upload file
4. Attach to interview if needed

Monitor engagement

1. View **Total Views**

2. Check individual interview views
 3. Identify high-performing profiles
-

Manage storage

1. Review storage bars
 2. Delete unused files if needed
 3. Upgrade plan if approaching limits
-

Limitations (Free plan)

- Limited number of published interviews
- No booking functionality
- Lower storage limits

Create Your First OpenInterview

Create your first OpenInterview by uploading your resume, letting the platform generate your initial profile, and then refining the content before sharing it publicly.

What this guide covers

This guide walks through the first part of the OpenInterview setup flow:

1. Upload your resume
2. Wait while your resume is processed
3. Review the generated profile
4. Understand each section of the new profile page
5. Move to the next step: editing, video, calendar, and sharing

Before you begin

Make sure you have:

- an up-to-date resume in PDF format
- your preferred role title and summary in mind
- a headshot, profile image, or intro video ready if you plan to personalize the page further

Step 1: Upload your resume

On the OpenInterview creation page, start by uploading your resume using the upload box.

What you will see

The page includes:

- a large headline introducing the OpenInterview experience
- a drag-and-drop upload area
- a **Browse Files** button for manual upload

How to upload

You can upload your resume in either of two ways:

Drag and drop

Drag your resume file directly into the upload box.

Browse files

Click **Browse Files** and select your resume from your device.

What happens after upload

Once the file is accepted:

- the file name appears below the upload area
- OpenInterview begins processing the document automatically
- you move into the resume analysis stage

Step 2: Resume processing

After upload, OpenInterview analyzes your resume and prepares your first profile draft.

What the processing screen shows

The processing state includes:

- the uploaded file name
- a progress bar
- a percentage indicator
- a status message such as “Finalizing setup...”

What OpenInterview is doing during this step

At this stage, the platform is extracting and organizing information from your resume, including:

- your name
- current or target role
- location
- professional summary
- key highlights
- resume content
- profile-ready formatting for the public page

What to expect

Processing usually results in:

- a structured profile layout
- automatically generated content blocks
- a profile page that is ready for review and editing

Step 3: Review your generated profile

Once processing is complete, OpenInterview takes you to your newly created profile page.

This page is your first live interview profile draft. It is already populated with information from your resume and structured into shareable sections.

At this stage, the profile is meant to give you a strong starting point. You will still review and edit it before sharing.

Profile page overview

The generated profile page is organized into a main content area and a right-side profile panel.

Top action bar

At the top of the page, you will see a welcome banner and primary actions.

What this section includes

- a greeting with your name
- a short message explaining this is your public interview page
- an **Edit Profile** button
- a **Share** button

What this section means

This is the control area for your profile.

Edit Profile

Used to refine and update each section of the page.

Share

Used later, after your profile is ready to publish and distribute.
At this stage, the most important next action is **Edit Profile**.

Main video section

The large video area is the centerpiece of the profile page.

What this section is for

This is where your OpenInterview video introduction will appear.

What you see initially

Before uploading a video, this section may display:

- a placeholder player state
- a thumbnail area
- a play button overlay

What it becomes later

After you upload your video, this section becomes the main recorded introduction recruiters and employers will watch first.

Why it matters

This is the most important personal element on the page because it turns your resume into a more human, differentiated profile.

Right-side profile card

The right column contains your core candidate summary.

What this section includes

- profile image or avatar
- full name
- role title
- location
- short professional summary

How it is generated

This content is initially pulled from your resume and arranged into a concise candidate snapshot.

What to review here

You should check:

- name formatting
- title accuracy
- location accuracy
- summary tone and clarity

Why this section matters

This is the fastest way for a viewer to understand who you are and what type of role you fit.

Bookings panel

Below the profile summary card is the bookings calendar section.

What this section is for

This is where viewers will eventually see your interview availability and request time with you.

What you may see initially

At this stage, the calendar may show:

- a month view
- timezone information
- no available slots yet

Why it is empty at first

Availability has not been configured yet. This will be set during the next step when you edit the profile and define your calendar schedule.

What happens later

After availability is configured, this section becomes your live booking area.

Attachments section

On the left side under the main video area, you may see an **Attachments** section.

What this section is for

This area is used to display supporting files that help strengthen your profile.

Examples of attachments

- portfolio files
- certifications
- work samples
- supplemental documents

What you may see initially

If nothing has been uploaded yet, this section may show that no attachments are available.

Connect section

Below Attachments is the **Connect** section.

What this section is for

This area gives viewers additional ways to learn about you or connect with your professional presence.

Common example

- LinkedIn profile link

Why it matters

This helps extend your profile beyond the OpenInterview page and gives recruiters another trusted source of professional context.

Highlights section

The **Highlights** section presents your experience in quick, readable bullet points.

What this section includes

This content is generated from your resume and may include:

- years of experience
- technical strengths
- role specialization
- workflow or domain expertise
- collaboration or leadership strengths

Why this section matters

It gives hiring teams a fast scan of your strongest qualifications without reading the full resume first.

What to review

You should confirm:

- the bullets are accurate
 - the most important strengths are represented
 - the wording matches how you want to present yourself
-

Resume section

Further down the page, the full resume is embedded directly into the profile.

What this section includes

- a preview of the uploaded resume
- the original file name
- a **Download Resume** button

What this is for

This lets viewers:

- read the full resume without leaving the page
- download it directly if needed

Why it matters

It combines the benefits of a modern profile page with the practicality of a traditional resume.

What OpenInterview has done for you so far

By the time you reach this page, OpenInterview has already:

- accepted your uploaded resume
- processed the document
- extracted your core candidate details
- created a formatted public profile structure
- generated summary content and highlights
- embedded your resume into the page
- prepared a booking section for future availability setup

This gives you a complete starting point rather than a blank profile.

What to review before editing

Before clicking **Edit Profile**, review the generated page for:

Identity details

- correct name
- correct role title
- correct city or location

Summary quality

- accurate positioning
- clear wording
- professional tone

Highlights

- strongest points included
- phrasing aligned with your goals

Resume preview

- correct file
- readable formatting
- correct download behavior

Page completeness

- whether you want attachments
 - whether you want external links such as LinkedIn
 - whether the profile is ready for a video and calendar setup
-

Next step: Edit your profile

Once your initial profile has been created, the next step is to click **Edit Profile**.

In the editing flow, you will:

- refine the wording in each section
 - update your summary and highlights
 - add or revise links and attachments
 - set calendar availability
 - upload your profile video
 - prepare the page for sharing
-

What comes next

The next stage of setup is where your draft becomes a polished, public-facing OpenInterview profile.

This includes:

- final verbiage
- video upload
- booking availability
- sharing your profile link

>Editing Your OpenInterview

Metadata:

- Resume (Manage File)
- Attachments
- Highlights
- Skills
- Experience
- Education
- Availability (Weekly Hours)
- Scheduling Rules (Booking Settings)
- Save & Share Your Profile

>Content

Edit Your OpenInterview Profile

Refine, personalize, and complete your OpenInterview profile before sharing it publicly.

What this page is

The Edit Profile page is where your automatically generated profile becomes a polished, recruiter-ready experience.

After your resume is processed, OpenInterview creates a strong draft. This page allows you to:

- refine wording
- add personal elements
- configure availability
- prepare your profile for sharing

When to use this page

Use this page to:

- finalize your profile content
 - upload your video introduction
 - adjust highlights, skills, and experience
 - configure booking availability
 - prepare your profile for public sharing
-

Page overview

The Edit Profile page is structured top-to-bottom in the following sections:

1. Profile setup and resume (optional)
2. Identity and media (photo + video)
3. Personal details (bio, contact, links)
4. Resume and attachments
5. Professional content (highlights, skills, experience, education)
6. Availability and booking rules
7. Save and share

Profile setup

Profile Name

Defines the title of your OpenInterview.

Example

Rajesh Venkataraman – Data Engineer

Best practice

- Use: **Full Name – Role**
- Keep it clear and professional
- This may be visible when shared

Auto-populate with Resume (Optional)

Upload a new resume to regenerate profile content.

Important

This step is **optional**.

Most users can skip this because:

- your profile has already been generated from your original resume
- all sections can be edited manually below

When to use this

Use this only if:

- you want to replace your original resume
- you have a more updated or targeted version
- you want to regenerate highlights and content automatically

Actions

- Upload resume
- Click **Auto-populate from Resume**

Identity and media

Profile Photo

Upload or update your profile image.

Why it matters

- Adds credibility and personalization

- Helps recruiters quickly recognize you

Best practices

- Use a clear, professional headshot
 - Neutral background preferred
-

Video section

Upload your OpenInterview video introduction.

What this section includes

- Video player preview
- **Change Video** button

What to do

- Upload or replace your video
- Ensure audio and framing are clear

Why it matters

This is the most important part of your profile.

It allows recruiters to:

- hear how you communicate
 - understand your personality
 - evaluate fit beyond the resume
-

Video Thumbnail

Upload a custom thumbnail image for your video.

Video Thumbnail

Why it matters

- This is the first visual impression
- Impacts whether someone clicks to watch

Best practices

- Use a clear, professional still
 - Avoid blurry or dark images
-

Personal details

Contact Information

Includes:

- Location
- Telephone
- Email

Notes

- Keep information accurate and professional
- Only include contact details you are comfortable sharing

Short Bio

A concise summary of your professional background.

What it should include

- years of experience
- core strengths
- technical or domain expertise
- type of roles you are targeting

Best practice

- Keep it 2–4 sentences
- Clear, confident, and direct

Social Media

Add external links to your professional presence.

Common links

- LinkedIn (recommended)
- Portfolio site
- GitHub (for technical roles)

Actions

- Add new link
- Select platform type
- Enter URL
- Remove if needed

Resume and attachments

Resume

Displays your uploaded resume.

Resume

 Rajesh_Venkataraman_Data_Engineer_Resume.pdf

 Upload Files

Actions

- Upload new file
- Replace existing file
- Delete file

Notes

- This is the version visible on your profile
- Ensure it is up to date

Attachments

Upload additional supporting files.

Examples

- Portfolio samples
- Certifications
- Project documents
- Case studies

Notes

- Optional but valuable for differentiation

Professional content

Highlights

Short bullet points summarizing your strengths.

Highlights

Senior Data Engineer with 7+ years of experience in data engineering.

Expert in building scalable data pipelines and cloud-based data platforms.

What to include

- experience level
- technical strengths
- impact statements
- domain expertise

Actions

- Edit existing highlights
- Delete highlights
- Add new highlight

Best practices

- Keep each point concise
- Focus on impact and clarity

Skills

Add key skills as tags.

Skills

Python × SQL × Spark × AWS × Data Engineering ×

Add a skill

Add

Examples

- Python

- Best Practices

Share Your OpenInterview Profile

Once your profile is complete and saved, you can share it with recruiters, hiring managers, or anyone reviewing your candidacy.

What this step is

This step allows you to distribute your OpenInterview profile using:

- direct email invitations
- a shareable profile link

Your profile is now fully live and ready to be viewed.

When to share your profile

You should share your profile after:

- completing all sections (bio, highlights, experience)
- uploading your video introduction
- setting your availability (if using bookings)

Return to your profile page

After clicking **Save Updates** in the Edit Profile screen, you are returned to your public profile page.

The screenshot shows the OpenInterview profile page for Rajesh Venkataraman. The page layout includes a header with navigation links (Dashboard, My Bookings, Subscription, New Interview) and a user profile card. The main content area is divided into several sections: a welcome message, a profile picture and bio, a video introduction, a list of attachments, a list of highlights, and a bookings calendar.

Highlights

- Senior Data Engineer with 7+ years of experience in data engineering.
- Expert in building scalable data pipelines and cloud-based data platforms.
- Proficient in Python, SQL, Spark, and modern data stack technologies.
- Experienced in optimizing data workflows and improving performance metrics.

Bookings
April 2026
Time Zone: America/New_York

S	M	T	W	T	F	S
				1	2	3
				4		
5	6	7	8	9	10	11
12	13	14	15	16	17	18
19	20	21	22	23	24	25
26	27	28	29	30		

What you will see

Your profile now includes:

- your video (if uploaded)
- updated bio and highlights
- resume preview
- profile image
- booking calendar (if configured)

At the top of the page, you will see two main actions:

- **Edit Profile**
- **Share**

Share button

Click the **Share** button to open the sharing interface.

What this does

- Opens a modal window
- Allows you to send or copy your profile

Share modal overview

The Share Profile modal includes two primary ways to share your profile:

1. Send via email
2. Copy a direct link

Share via email

You can send your profile directly to someone's inbox.

Fields

Email

Enter the recipient's email address.

Message (optional)

Add a short message to personalize your outreach.

Example message

“Hi, I'd love for you to take a look at my OpenInterview profile. It includes a video introduction and highlights of my experience.”

Send invite

Click **Send Invite** to email your profile.

What happens

- The recipient receives a link to your profile
 - Your message (if included) is sent with it
 - They can immediately view your profile
-

Copy profile link

Alternatively, you can copy a direct link to your profile.

How to use

Click **Copy Link to Profile**

What you can do with the link

- paste into job applications
 - send via LinkedIn messages
 - include in email outreach
 - add to your resume or portfolio
-

When to use each option

Use email sharing when:

- you are applying directly to a recruiter
- you want a personalized introduction
- you are following up after a conversation

Use link sharing when:

- applying through job portals
 - networking on LinkedIn
 - sharing broadly across channels
-

What recruiters see

When someone opens your profile, they will see:

- your video introduction
 - your professional summary
 - key highlights
 - resume preview and download
 - attachments (if included)
 - booking calendar (if enabled)
-

Best practices for sharing

Keep your message short and direct

Avoid long explanations. Let your profile do the work.

Always include your video

Profiles with video significantly increase engagement.

Tailor your message when possible

A personalized message improves response rates.

Use your link consistently

Include it in:

- job applications
 - email signatures
 - LinkedIn outreach
-

You're now live

At this point, your OpenInterview profile is:

- complete

- shareable
- ready for recruiters

This replaces the traditional static resume with a dynamic, interactive profile.

>Create Additional Openinterviews

Metadata

/docs/help/create-new-openinterview

Create a New OpenInterview (Right Side)

- Overview
- Access New Interview
- New Editor Overview
- Upload Resume (Required)
- Auto-Populate Profile
- Continue Profile Setup
- Save & Share

Create a New OpenInterview

After creating your first OpenInterview, you can create additional profiles for different roles, opportunities, or resume variations.

What this step is

This flow allows you to create a **new, separate OpenInterview profile**.

Each OpenInterview can represent:

- a different role (e.g., Data Engineer vs Product Manager)
- a tailored resume for a specific job
- a variation of your experience or positioning

When to create a new OpenInterview

Create a new OpenInterview when:

- applying to different types of roles
- tailoring your profile for a specific company
- testing different positioning or messaging
- maintaining multiple versions of your resume

Access New Interview

From anywhere in the platform, click:

New Interview (top navigation)

Dashboard

My Bookings

Subscription

New Interview

What happens

- Opens a new OpenInterview editor
- Starts a fresh profile
- Does not overwrite your existing profiles

New editor overview

The new editor page looks similar to the original setup, but starts blank.

What you will see

- Profile Name field (empty)
- Auto-populate with Resume section
- Upload Resume button
- Storage indicators (video + document)

oi openinterview.me **Save Profile**

Video Storage 59.4 MB / 5 GB

Document Storage 18.7 KB / 307.2 MB

Profile Name

e.g. Senior Product Manager Application

Auto-populate with Resume

Upload a new resume to automatically fill out your profile.

Browse

Upload Resume

Auto-populate from Resume

Upload resume (required)

Unlike your first OpenInterview, this step is **required**.

Why it is required

- This is a new profile with no existing data
- OpenInterview needs a resume to generate content
- All sections (bio, highlights, experience) depend on this input

How to upload

1. Click **Upload Resume**
2. Select your file
3. Confirm upload

What happens next

After uploading:

- the resume is processed
- profile content is generated
- your profile is auto-populated

Auto-populate profile

Click **Auto-populate from Resume** to generate your profile.

What this does

OpenInterview will:

- extract your information
- generate your profile structure
- create highlights and summary content
- prepare your profile for editing

Continue profile setup

After auto-population, the flow is identical to your first OpenInterview.

You will:

- review generated content
- click **Edit Profile**
- refine all sections
- upload your video
- set availability

Key difference from first OpenInterview

Step	First OpenInterview	New OpenInterview
Resume upload	Already completed	Required
Auto-populate	Optional (can skip)	Required
Profile base	Pre-generated	Starts blank

Save your profile

After completing setup:

1. Click **Save Profile**
2. Review your profile page
3. Confirm all sections are complete

Share your new profile

Once saved, you can:

- click **Share**
- send via email
- copy your profile link

Each OpenInterview has its own unique shareable link.

Best practices

Create role-specific profiles

Tailor each OpenInterview to a specific job type.

Use different resumes

Upload targeted resumes for better alignment.

Customize messaging

Adjust your bio, highlights, and video to match the role.

You can now manage multiple profiles

Each OpenInterview is independent, allowing you to:

- maintain multiple versions of yourself
- target different opportunities
- share the most relevant profile per application
